

Corporate Profile

Origins

We are a proudly South African IT service provider that specialises in the provision of storage and networking solutions. Maxtec was established in 1986 and has evolved its offering from the provision of PC storage solutions, to reliable and accessible data storage, to that of a complete IT equipment, services and solutions provider to technology users across the business spectrum. Through our long term partnerships with leading national and international vendors, Maxtec boasts a number of highly skilled and experienced engineers. We add value to any customer partnership through infrastructure design, implementation, maintenance and support of the solutions that we offer.

Maxtec Vision

To remain the number one data integrity firm. The firm that is widely recognised as standing apart for the quality of our advice and for our unwavering commitment to our clients.

Solutions

Maxtec helps simplify networking by reducing the cost and complexity of distributed enterprise deployments. These solutions, based on our unique distributed intelligence architecture, include enterprise-class Wi-Fi, state-of-the-art and easy-to-deploy threat management, new generation security and BYOD (Bring your own device) capabilities.

The influence of the mobility explosion, and the emergence of Wi-Fi as the primary access layer, the efficiencies of security services, and the decentralisation of the corporate office through secure home access, micro-branches and partnering, are the trends forcing enterprises to re-evaluate their network's access architecture.

Maxtec's solutions address these trends and technologies and help to enhance enterprise productivity, while at the same time reduce the cost and complexity of today's networks.

Vendors

FORTINET

Fortinet is a worldwide provider of network security appliances and a market leader in unified threat management (UTM). Our products and subscription services provide broad, integrated and high-performance protection against dynamic security threats while simplifying the IT security infrastructure.

ARISTA

Arista Networks was founded to pioneer and deliver software-driven cloud networking solutions for large data centre storage and computing environments. Arista's award-winning platforms, ranging in Ethernet speeds from 10 to 100 gigabits per second, redefine scalability, agility and resilience.

Allot communications

Allot Communications is a leading global provider of intelligent broadband solutions that put mobile, fixed and enterprise networks at the centre of the digital lifestyle. Allot's DPI-based solutions identify and leverage the business intelligence in data networks, empowering operators to shape digital lifestyle experiences and to capitalize on the network traffic they generate.

tenable network security

Tenable is at a transition in cyber security technology that will change the way companies protect their networks. Tenable started the revolution when one of its co-founders created the Nessus® vulnerability scanner, the first robust solution for detecting vulnerabilities that viruses and hackers can exploit. The Tenable platform has evolved into today's most powerful vulnerability and threat detection technology.

SPECTRA

Dedicated solely to storage innovation for more than 35 years, Spectra Logic's uncompromising product and customer focus is proven by the largest information users in multiple vertical markets globally. Spectra enables affordable, multi-decade data storage and access by creating new methods of managing information in all forms of deep storage—including archive, backup, cold storage, cloud and private cloud.

Infortrend

Fully dedicated to storage solutions, Infortrend has a strong technological foundation that includes one of the best R&D teams in the industry. All Infortrend product systems are designed and manufactured in-house. Infortrend storage solutions have been widely deployed on a variety of demanding applications by multiple users across commercial and industrial markets.

appliansys

At ApplianSys, we look at the challenges facing network managers and identify where an appliance solution could provide answers to their network, security and messaging issues. We integrate best-of-breed network application software from vendor partners and the open source community into our appliance wrapper. Simple, secure, reliable and designed to save you time and money.

TANDBERG DATA

Tandberg Data is a leading global supplier of data storage and data protection solutions for small and medium-sized businesses. The company's wide selection of business-grade storage solutions includes disk-based appliances, tape-based solutions, including drives, autoloaders, libraries and media, removable disk and software for backup, archiving, and deduplication.

perle

Perle is a premier provider of reliable, full-featured and competitively priced serial, I/O, Ethernet and fibre connectivity solutions. Businesses around the globe have come to trust Perle to deliver superior connectivity technology for their mission critical applications.

druva

As the industry's fastest growing cloud data protection and information management provider, Druva is trusted by over 4,000 global organizations with over 25 PB of data under management. Druva's award-winning solutions intelligently collect and dramatically increase the availability and visibility of data, while reducing the risk, cost, and complexity of managing and protecting it.
